How-To Section: Mastering Key First Aid Techniques

Let's break down a key technique: Treating a Burn.

1. Cool the Burn: Immediately immerse the burned area in cool (not cold!) running water for at least 20 minutes. This helps to reduce pain and prevent further tissue damage. Avoid using ice or ice water.
2. Remove Clothing: Carefully remove any clothing or jewelry from the burned area, unless it's stuck to the skin.
3. Cover the Burn: Loosely cover the burn with a clean, sterile dressing. Avoid using fluffy materials like cotton wool.
4. Pain Relief: Over-the-counter pain relievers like ibuprofen or acetaminophen can help manage pain.
5. Seek Medical Attention: Seek

immediate medical attention for severe burns (e.g., deep burns, burns covering a large area, burns to the face, hands, feet, or genitals).
